

Dear Parent/Guardian,

5th June 2017

WATER

During the last hour of school today, our water pumps have stopped working and consequently we have had no running water. We have managed this situation by using all of the toilets we have available and by ensuring that children use antibacterial wipes to wash their hands. We have called a maintenance engineer, and hope that this will be resolved this evening.

However, I must advise you in advance that if the problem cannot be fixed, we may need to close the school to pupils tomorrow due to the Health and Safety risk.

Can I please ask you to check our website for further information this evening and tomorrow morning? Website: www.priorshallalc.com

Thank you for your co-operation.

Yours sincerely,

Linda Culbert
Head Teacher
